Gillurkar Multispeciality Hospital

Clinical Research Coordinator

Feb 2016 – Feb 2017

- Managed patient and study data with high accuracy.
- Maintained data integrity across research documentation.
- Assisted in preparing reports and tracking study progress.

Cognizant

Data Analyst / Drug Safety Associate

Aug 2012 – Jan 2015

- Processed and transformed clinical and safety datasets for analysis.
- Performed medical coding and quality review for adverse event data.
- Supported data reporting using Excel-based analysis and validation.

Projects

mobile-sales-dashboard

Soft Skills

Communication, Teamwork,
Problem Solving

Languages

English, Hindi, Marathi

Certifications

DATA ANALYTICS Certificate,
Microsoft Excel Course
Certificate,
Python for Data Science,
SQL Course Certificate,
Microsoft Power BI Course
Certificate

Designed and developed an interactive Power BI dashboard to monitor mobile sales performance across various regions. Utilized data modeling, DAX calculations, and visualization techniques to provide actionable business insights.

Apr 2026 – Apr 2026

- Built an interactive dashboard with KPI cards, charts, filters, and drill-down analysis.
- Analyzed sales trends, revenue performance, and product-wise contribution.
- Created DAX measures for key business metrics and performance tracking.
- Improved data visualization and reporting efficiency through dynamic filtering and dashboard design.
- Delivered actionable insights for identifying top-performing products and sales trends.

Online-Bookstore-Analysis

Developed an end-to-end sales analytics project using Python (Pandas) and Power BI, performing data cleaning, feature engineering, analysis, and dashboard development to uncover customer, product, and revenue insights.

May 2026 – May 2026

- Analyzed 500 sales transactions involving 307 unique customers.
- Merged and transformed multiple datasets using Pandas for business analysis.
- Created custom features such as Price Category, Year, and Month for trend analysis.
- Developed interactive Power BI dashboards with KPI cards, slicers, and DAX measures.
- Identified Romance as the highest revenue-generating genre and Expensive books as the largest revenue contributor (53.5%).

IPL 2023 Cricket Analytics | SQL Server, GitHub

Analyzed IPL 2023 ball-by-ball and match-level data using SQL Server to generate insights on team performance, player performance, match outcomes, and season trends.

Jun 2026 – Jun 2026

- Analyzed 17,863 ball-by-ball records and 74 match records using SQL Server.
- Developed analytical queries using JOINS, CTEs, CASE statements, and Window Functions.
- Generated player and team performance insights, including top scorers, wicket takers, and toss impact analysis.
- Applied RANK(), DENSE_RANK(), and Running Totals to perform advanced season-level analytics.
