Summary

Data analytics professional with 5+ years of Pharmacovigilance experience and strong skills in SQL, Python, Excel, Power BI, and Statistics. Experienced in data quality review, analysis, and dashboard development through real-world projects. Seeking to transition into a Data Analyst role and drive data-driven decision-making.

Education

PGDBM in International Trade Management

Bhavan's Rajendra Prasad Institute for Communication and Management
Jul 2010 – Apr 2011

Bachelor of Pharmacy

RTM Nagpur University
Sep 2004 – Jun 2009

Technical Skills

Programming: Python, SQL, MYSQL, SQL Server,

Data Analysis: Pandas, NumPy, Statistics,

Visualization: Power BI, DAX,

Excel: Power Query, Pivot Tables, XLOOKUP,

Other: GitHub, Data Cleaning, ETL

Soft Skills

Communication, Teamwork,

Work Experience

PrimeVigilance

PV Associate

Apr 2024 – Oct 2024

- Processed and validated pharmacovigilance case data for regulatory compliance.
- Performed data quality checks and trend analysis for safety reporting.
- Generated quality reports for internal review and monitoring.

Qinecsa Solutions

Drug Safety Associate II

Sep 2020 – Nov 2022

- Reviewed safety case data for completeness and consistency.
- Improved workflow efficiency through structured data validation.
- Collaborated with cross-functional teams to maintain reporting timelines.

Lata Medical Research Foundation

Research Officer

Feb 2017 – May 2019

- Managed 1000+ patient records with 99% data accuracy.
- Maintained data integrity across research documentation.
- Assisted in preparing reports and tracking study progress.

Gillurkar Multispeciality Hospital

Clinical Research Coordinator

Feb 2016 – Feb 2017

- Managed patient and study data with high accuracy.
- Maintained data integrity across research documentation.
- Assisted in preparing reports and tracking study progress.

Cognizant

Data Analyst / Drug Safety Associate

Aug 2012 – Jan 2015

- Processed and transformed clinical and safety datasets for analysis.
- Performed medical coding and quality review for adverse event data.
- Supported data reporting using Excel-based analysis and validation.

Projects

mobile-sales-dashboard

Languages

English, Hindi, Marathi

Certifications

Data Analytics Certification,
Microsoft Excel Certification,
Python for Data Science,
SQL Certification,
Microsoft Power BI Certification

Designed and developed an interactive Power BI dashboard to monitor mobile sales performance across products, brands, and regions. Utilized data modeling, DAX calculations, and visualization techniques to provide actionable business insights.

Apr 2026 – Apr 2026

- GitHub: <https://github.com/SujeetJaiswal1113/mobile-sales-dashboard.git>
- Built an interactive dashboard with KPI cards, charts, filters, and drill-down analysis.
- Analyzed sales trends, revenue performance, and product-wise contribution.
- Created DAX measures for key business metrics and performance tracking.
- Improved data visualization and reporting efficiency through dynamic filtering and dashboard design.
- Delivered actionable insights for identifying top-performing products and sales trends.

Online-Bookstore-Analysis

Developed an end-to-end sales analytics project using Python (Pandas) and Power BI, performing data cleaning, feature engineering, analysis, and dashboard development to uncover customer, product, and revenue insights.

May 2026 – May 2026

- GitHub: <https://github.com/SujeetJaiswal1113/Online-Bookstore-Analysis>
- Analyzed 500 sales transactions and 307 customer records using Python (Pandas).
- Performed data transformation, feature engineering, and trend analysis.
- Built interactive Power BI dashboards using KPI cards, slicers, and DAX measures.
- Identified key revenue drivers, including Romance as the top genre and Expensive books contributing 53.5% of revenue.

IPL 2023 Cricket Analytics | SQL Server, GitHub

Analyzed IPL 2023 ball-by-ball and match-level data using SQL Server to generate insights on team performance, player performance, match outcomes, and season trends.

Jun 2026 – Jun 2026

- GitHub: <https://github.com/SujeetJaiswal1113/IPL2023-SQL-ANALYSIS.git>
- Analyzed 17,863 ball-by-ball records and 74 match records using SQL Server.
- Developed analytical queries using JOINS, CTEs, CASE statements, and Window Functions.
- Generated player and team performance insights, including top scorers, wicket takers, and toss impact analysis.
- Applied RANK(), DENSE_RANK(), and Running Totals to perform advanced season-level analytics.
